### Skills Summary

### Expertise

### About Me

Dynamic and motivated IT professional with two years of experience in the industry. Skilled in project development using HTML, CSS, PHP, and Python tools. Proficient in teamwork and collaboration, with a keen enthusiasm for learning and adapting to new technologies. Experienced in freelance logo design projects.

### Experience

#### Merkle

Dec-2022 Dec-2023

As an **Associate Analyst**, I specialize in managing backend systems and databases, leveraging SQL and Python. My responsibilities include designing, implementing, and maintaining robust backend solutions for websites. Additionally, I occasionally engage in web page design tasks, contributing to the overall user experience. With a focus on efficiency and reliability, I ensure seamless integration between frontend and backend components to deliver high-quality, user-centric applications."

#### Merkle Inc.

Jan-2022 Dec-2022

- **Consultant**, I'm serving a leading US Multinational E-commerce company. Specialized in incident handling, customer issue resolution, and adherence to client SLAs. Proficient in collaborating with client personnel to gather requirements for changes in the TMS tool, including the creation and update of Magellan Rules. Skilled in performing staging checks and quality assurance in the production environment to ensure the efficient performance of affected functionalities. Additionally, adept at inventory reconciliation and product validation on the e-commerce site.
